

Techniques of Survey

1- What would archaeologists do before studying a vanished society?

They would find evidence of a vanished society, in so far as evidence is observable from the land's surface.

2- What do chips of flint show?

They show that someone made a stone tool.

3- What does a faint depression running across a desert show?

It shows the presence of an ancient irrigation canal.

4- What should archaeologists do when they find any information?

They should record the information, such as maps, photographs, notes of all observations, and samples of the cultural material.

5- What should archaeologists have if they are to avoid being misled?

They should have keen observation, experience, and good judgement.

Visible	واضح
Desert	صحراء
Experience	خبرة
Track	مسار/ أثر سير
Comparison	مقارنة
Farmland	مزرعة
Boulder	صخرة
Chip	رُقاقة
Depression	مُنخفض
Ditches	خنادق
Ecological	بيئي
Faint	غير واضح
Flint	حجر الصوان
Foundation	أساس
Irrigation	الري
Locations	مواقع
Misled	مخدوع
Observable	يمكن ملاحظته
Pertinent	متعلق بالموضوع
Pit	حفرة
Recent	حديث

Record	يُسجَل
Resemble	يشبه
Ruined	مُهَدَّم
Sample	عينة
Signify	يدل على
Tomb	قبر
Traces	آثار
Unearthed	اكتشَف
Vanished	مُتلاشي
